

About the Author

István Tasi was born in 1970 in Hungary (Europe). Qualifications: Cultural anthropologist (MA, 1998) and Vaishnava theologian (MT, 2005). He is currently a teacher of the Bhaktivedanta College and researcher of the Vedic Science Research Center. The aim of the Center is to answer modern scientific and social questions based on the Vaishnava understanding of the ancient knowledge of India. He has organized science and spirituality conferences for several times. Istvan has been a member of the International Society for Krishna Consciousness since 1992. He is also an active member of the Hungarian Intelligent Design Movement. He is the author of the following books: *Where science stops* (Hungarian, 1999); *Nature's IQ* (2002; English edition 2008); *Vaishnavism and Christianity* (2003); *What, If There Is No Evolution?* (2007). Edited publications: *Darwin's Decline* (2001); *Science Discovers God* (2005).
