

About the Author

Dr. A.K. Mukhopadhyay, a medical graduate from the University of Calcutta (1977), a graduate (MD) from All India Institute of Medical Sciences (1981), joined the Faculty of AIIMS in 1985. At present he is Professor & Head, Department of Laboratory Medicine at AIIMS. He is Member of the National Academy of Medical Sciences (India), New York Academy of Sciences, USA, Society for Scientific Exploration USA, Scientific and Medical Network, UK, a Fellow of International Society for Philosophical Enquiry, USA. From India he was an invitee of Pontifical Academy of Sciences, Vatican, during Academy's meeting of Science for Man and Man for Science in November, 1999.

Dr. Mukhopadhyay coined the term and concept of supracortical consciousness in 1985 and developed further this idea integrating Science, Humanity and Spirit. His keen desire to develop a Science for Consciousness has given birth to four worthy documents. (i) Frontiers of Research for Human Biologists (1985), (ii) The Dynamic Web of Supracortical Consciousness (1987), (iii) Conquering the Brain (1995) and (iv) The Millennium Bridge (2000). His several lengthy scholarly papers have been published in Philosophical Volumes published from Centre for Study of Civilization, in the gigantic Project of History of Indian Science, Philosophy and Culture.

A new Paradigm is, therefore, on the making, which the author calls the Akhanda Paradigm. The Akhanda is an individual indivisible from the Whole. The Akhanda Paradigm is a Paradigm which deals with the divisions of the Indivisible holding Consciousness-Mother Nature as irreducible and inviolable constant.
