Abstract

Varied questions come to my mind when I have to write and speak on the topic of “Corporate Leadership and Spirituality” – what do we mean by a Leader? What are the attributes of a good leader? Why are certain people great leaders and have made extraordinary things happen and why certain see success for some time and then fail eventually? How is spirituality and leadership related? How does spiritual leadership related to corporate? Is it not the sole function of corporates to give better returns to all their stakeholders? This article, dwells upon these questions. I share my views on the terms corporate, leadership and spirituality separately, and come to the conclusion that spirituality is the basis for an effective leader and successful corporation.
